

WHERE SOCIAL SCIENCE MEETS TECHNOLOGY AND SECURITY

Job opportunity for IT ENGINEERING RESEARCHER profile.

Eticas is a research company focused on responsible innovation, evaluating the social, legal, and ethical impacts of technological policies and technologies. We assist the development of new technological solutions and projects, helping to ensure that privacy, non-discrimination, social cohesion, trust and security are reflected in the technological development process. A list of services we offer is available here: <http://www.eticasconsulting.com/services/>

Our current range of projects requires different skillsets and versatility with different topics and methodologies. We are therefore looking for people with varied interests and experience who can cover multiple issue areas.

We are currently seeking someone with the following profile:

IT Engineer with social science skills.

- Education and/or experience in information technologies. Good knowledge of large and medium scale IT projects development methodologies involving user driven design and innovation. A degree in software engineering, industrial engineering, telecommunications engineering, physical sciences or similar would be required
- Interest in the social, legal and ethical impact of the technology. Experience in this area is highly welcomed.
- Command of spoken and written English (the main language of our work).
- Asset qualifications: data visualization, knowledge of web design, experience in EU R&D project or grant proposal writing, knowledge of information or technology security (e.g. Biometrics, crisis management and others), demonstration of initiative.

We are looking to hire immediately or in the medium-term. Pay is commensurate with skills and qualifications. Work will be primarily in the Barcelona office, but the Dublin and Madrid offices may also be used. Hours of work are flexible and work is completed by objectives.

If you are interested in this work offer and would like to send your CV, please do so before 15 January to jobs@eticasconsulting.com (mention IT ENGINEERING in the subject line) and include the following **in a single document** and in the following order:

- 1) Cover letter in Spanish, Catalan, or English which highlights your fit in our project
- 2) A CV sufficiently extensive to give us an idea of who you are and what you have done
- 3) A relevant writing sample such as an academic article, an opinion piece, or a report (we will treat these with maximum confidentiality)
